07/2013 - 07/2017

GPA

7.58 / 10

PROJECTS & EXPERIENCE

Blogging Website

<https://blogging-project-frontend-muo8fzpdn-shrutijain2296.vercel.app/>

Github link - <https://blogging-project-frontend-muo8fzpdn-shrutijain2296.vercel.app/>

- Tech Stack - React js, Node js, MongoDB, Express.js, React Bootstrap**
- Designed and implemented a secure blogging platform with JWT authentication, empowering users to seamlessly create, edit, and delete their blogs, while enhancing user engagement through personalized experiences, including follow/unfollow functionality and the ability to view blogs from those they follow within a comprehensive project.

Personal Finance Tracker

<https://650d3c89d37e241542d53d29--dynamic-gumpton-c01916.netlify.app/>

Github link - <https://github.com/shrutijain2296/Financely--personal-finance-tracker/tree/main>

- Tech Stack - React js, Firebase, Ant Design**
- A simple and efficient personal finance tracking application created with the goal of managing personal finances effectively. It is a userfriendly interface, implemented authentication and database functionalities, visualize financial statistics, track transactions, and more.

Crypto Tracker

<https://capable-macaron-5e7439.netlify.app/>

Github link - <https://github.com/shrutijain2296/Crypto-tracker/tree/main>

- Tech Stack - React js, Material UI, Chart js**
- This project delivers a responsive and real-time crypto tracker. It empowers users to compare cryptocurrencies, examine their price fluctuations, total volumes, and market caps, while enabling the addition of preferred currencies to a watchlist. The Framer Motion library enhances the user experience with seamless animations.
